Assignment Questions – PL/SQL

1. Write a PL/SQL program to accept marks obtained by a student in five subjects, calculate the total and average, and display the grade using appropriate conditional statements.
2. Write a PL/SQL program to calculate the gross salary and net salary of an employee based on basic salary, HRA, DA, PF, and other deductions.
3. Write a PL/SQL program to accept a number N and display all prime numbers from 1 to N.
4. Create a STUDENT table containing student ID, name, and marks. Write a PL/SQL program using an explicit cursor to calculate and display the grade of each student.
5. Develop a PL/SQL application that performs deposit, withdrawal, fund transfer, and balance enquiry. Use stored procedures and exception handling to ensure transaction validity.
6. Design PL/SQL procedures and triggers for placing orders, updating product inventory, calculating order totals, and generating an invoice.
7. Create a PL/SQL function to calculate an employee's bonus based on salary and years of service. Use the function in a SQL query to display employee details and bonus.
8. Write a PL/SQL block using IF-THEN-ELSIF to perform addition, subtraction, multiplication, or division based on two numbers and an operator entered by the user.
9. Develop a PL/SQL program for a hospital database that uses procedures, functions, cursors, and triggers to manage patient appointments, doctor details, billing, and medicine stock.
10. Create a PL/SQL function to calculate the fine for a returned book based on the number of days overdue. Display the book ID, student ID, return date, overdue days, and fine.
